

BUOYS

Measurement Networks

Networks

nke instrumentation provides autonomous instrumented buoys and measuring stations to industrials, power generators, water suppliers, collectivities, scientists etc...

nke instrumentation can offer dedicated technical solutions for all environments and requirements.

The teams of engineers and technicians bring all their skills in in-situ data measurement, transmission, storage and processing as well as in float and mooring design and integration in existing platforms.

From design to development, manufacture, site installation and maintenance of systems in operational condition, nke instrumentation listens to your needs.

Buoys

Measurement networks

Skills and know-how

Environment

- Lake
- Estuary
- Coastal and offshore waters
- Opportunities (vessel...)

Support

- Float and mooring
- Station dock and float
- Ships ...

Measurements

- Physico-chemical parameters
- Currents and tide
- Channel temperature
- Meteorological parameters
- Pollution, etc ...

Transmission

- GSM/GPRS
- UHF
- Iridium
- ARGOS

Data processing

- Data base creation
- HMI

Operational income

- On site intervention
- Remote maintenance
- Operational maintenance
