

WiMo Transmission Module

We come from the ocean

Underwater instruments

No software required

Web embedded WiMo interface

High robustness

Harsh and offshore environment

User-friendly module

Easy of use

Provider settings

SMTP / FTP protocol

Long-lasting autonomy

Alkaline batteries

3G/4G multi-operator module

French and foreign networks

Specifications

⚙️ PHYSICAL FEATURES	⚙️ MECHANICAL FEATURES
Dimensions: Total length: 242 mm Diameter: 114 mm Weight in air: 1,65 kg	Operating environment: Freshwater Sea water 1 meter immersion Battery: 8 Type C Alkaline batteries Battery life: 6 months (1 emission per day)

📶 TRANSMISSION	🌡️ TEMPERATURE
Features: Transmission 3G / 4G GPS Multi-operators Communication: 3G / 4G / serial link SMTP / FTP No dedicated software required: the modem is automatically detected by the sonde and set up through it via the web embedded interface	Operating temperature: -10°C / +50°C Storage temperature: -20°C / +70°C
